

ECKO

**OUR COMMITMENT
AND PROMISE:
ALWAYS 100%**

Ecko is a specialist when it comes to modern working techniques, production methods and tools for metalworking.

What makes us 100% ECKO is the consistent focus on one goal: To always give 100%. This applies to timely delivery, the agreed price and quality. Flawless and precise. Exactly as you ordered it.

100% PRECISION

CO₂ LASER TECHNOLOGY

Our ultra-modern laser cutting machine produces metal sheets from different material in various forms and sizes. With the highest precision and perfect edge quality. No matter whether the metal sheets are thick or fine, between 0.1 and 25 mm. And this without tools. This is how we can also produce smaller lot sizes for you in a cost-efficient way.

GRIP

100% TECHNOLOGY

BENDING

The press brake brings the workpiece into the right form. Radius and angle can be exactly adjusted.

WELDING

Temperature and welding speed have to be optimally tailored to each other. Our experts have many years of expertise in welding steel and aluminium.

SURFACE PROCESSING

All surfaces are ground and deburred for an immaculate result. Other surface treatments such as sand or glass bead blasting, coating, galvanising, phosphating or andonizing are also possible.

MECHANICAL PROCESSING

The mechanical processing of metal workpieces at ECKO is always tailor-made to your needs. Precise, fast and economic.

ASSEMBLY

Our assembly solutions are simple, fast and safe. As desired and required, we also produce suitable assembly jigs.
